## DIVE CONTROL SPECIALIST

**Dive Control Specialist** is the **1st Professional Level** to be reached in diving. This course is designed for divers who seek to retain further knowledge and experience to become responsible divers who choose to develop their diving. Dive control is a position in the Dive Industry where you can learn to be accountable with the acquisition of the leadership skills that you will require to implement promoting the future of diving. During your training you will learn to assist Instructors to acquire the confidence, understanding and skills required and associated with becoming a **Dive Control Specialist**.

On enrolling for this course you will be provided with the necessary course materials; The Student Dive Control Specialist Pack which includes all the materials you will need for your future training to become an **SSI Dive Control Specialist**.

Here at **BCDA** in association with **Scuba Schools International** we will supply all our candidates with the requirements of what it takes to becoming a **Dive Professional**.

Your pre-requisite to this course will be a qualification of 'Master Scuba Diver' or 'Advanced Open Water' Diver Certification combined with the Specialty 'Stress and Rescue' and the quantity of logged dives to provide the necessary **Level of Experience** required.

To be a Dive Con in training you will be required to compliment accessing a current **St. Johns 1st Aid Advanced Resuscitation** Certificate (or equivalent recognition).

There are **3 Methods** to take up your **Dive Control Specialist Qualification**;

**1** First method is through **Internship** which is the most valuable way to gain the knowledge and experience you'll require. Where you will gain greater opportunity to work alongside the Professionals to learn from hands on experience the requirements associated towards accreditation. A minimum period of **12 weeks**.

**2** An **Intensive Block Course** combined with the required 'Home Study' will touch on a window of experience to maximise the benefit of the requirements you will need to achieve the benefits to get you certified as **Dive Control Specialist**.

**3** Your **already a qualified** Dive Master with another Dive Agency and desire to extend your Leadership Skills with **Scuba Schools International**—minimum recertification requirements to be met, dependant on level of experience, current status and ability.

All the above methods will require the student pack, prior to undertaking the course to assure implementation of the **Home Study** requirements with a current medical Log of experience and qualifications.
