

'A Professional, fun and Safe Diving Environment'

OCEANIC
INNOVATION FIRST

SCUBA RANGERS COURSE

Scuba Rangers is a course designed to teach children of 8–11 years the skills of Scuba Diving.

The use of easy reference cartoon characters and the **Scuba Ranger** Star of learning promotes the correct use of **Skills, Knowledge, Equipment, Comfort, Confidence and Responsibility**. These are reinforced with each classroom session and the **Scuba Ranger** Pledge. The children are introduced to the specialist equipment required and how to use it underwater in the confined pool sessions throughout the week.

It is a **five day course** which provides each child with the course materials; a colourful Dive Log and Manual to see them through their dives to **DEMO day**. This finale is the opportunity to demonstrate the skills learnt and accesses the first accolade of achievement in becoming a qualified **Scuba Ranger**. We then invite each ranger to participate further '**Bubble Sessions**'—a continued confined activity conducted as with the course in our indoor heated swimming pool where more education and fun events developing the child's confidence. The idea is for each child to be able to familiarise enrolling an interest to retain their knowledge and understanding required for each to access the **Junior Open Water Diver Course** from the ages of 12 years.

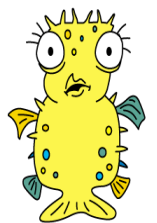

BCDA in association with **SSI** provide the equipment and environment with the learning tools within the company of qualified, trained **Scuba Ranger Instructors**.

We suggest the only pre-requisite for our rangers for hygiene is that they provide their own snorkelling equipment (Snorkel, mask, Fins and protection suit). On enrolling for Scuba Rangers course we shall provide a discount on any snorkelling package purchased as suggested above.

Children should be able to swim 25 metres and be medically fit to dive. Parents will be asked to complete a dive medical questionnaire for their child.

We run courses on demand during the school vacations to coincide with the children's availability with a Maximum of six children on each course.
